## PROFILE

RHYNO® is a name synonymous to packaging items in Gujarat for the last 29 years. RHYNO® group was founded by a group of businessman and pioneers in the packaging industry in 1996. RHYNO® has since then never looked back and continued its expansion in terms of capacity and product range.

We at RHYNO® group are an active, creative innovative and professionally managed family rather than a company, having specialization in manufacturing of packaging items, EPS (Thermocol), EPE foam, PP Corrugated Sheets and Boxes, Bubble Guard / Honey Comb Sheets & Stretch Films.

Our group of companies specialize in gathering of experts and specialists in R&D, manufacturing and marketing in the field of plastic packaging.

## MISSION

Achieve excellence and perfection by providing our clients with sustainable and efficient product at minimum possible cost. RHYNO®'s further mission is to continue expanding current facilities and machineries with equivalent focus on bringing new products under its brand name.

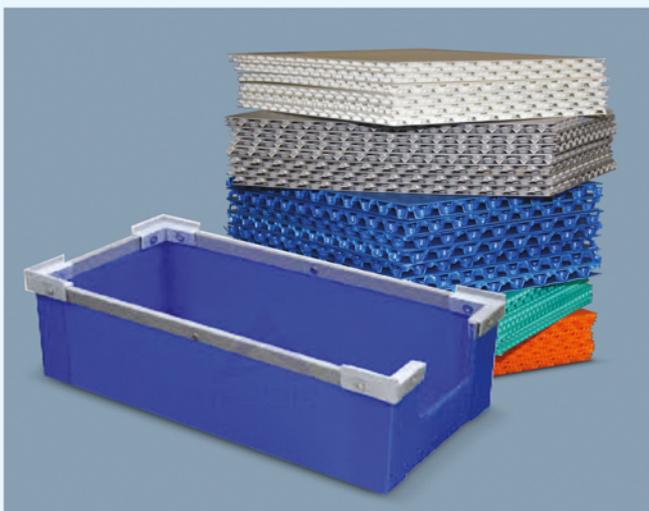

## VISION

'Growing' with clients' has always been the policy of the group. RHYNO® is on the path of innovative and creative thinking by servicing their clients with unique and very own packaging products.

RHYNO® believes in total packaging solutions under one roof, for its valuable clients. On the path of total packaging solutions, our group is introducing new products slowly and gradually under the brand name of RHYNO®.

We are committed and dedicated for its contribution towards Swachh Bharat Mission initiative launched by the government of India, and for this, RHYNO® is collecting EPS, EPE, PP Sheets & Film waste from the market and recycle the same at their factory premises.

PP BUBBLE GUARD SHEET

STRETCH FILMS

**RHINO**® Group's next targeted market was the plastic film industry. The plastic film industry is like a deep well of film products that has endless possibilities. Therefore, **RHINO** decided that it is time to enter the plastic film industry with a bang. In 2024, we began the manufacturing of **Stretch Films** under the company name of **Rhyno Wellpack LLP**. As the name suggests, Stretch Films are known for its ability to easily stretch and the protection it offers. Combining these two major features makes it applicable for various kinds of uses. **RHINO** believes stretch films is the introductory phase to the giant plastic film market.

STORAGE PROTECTION

PALLET WRAP

## APPLICATIONS

### PALLET WRAPPING

Stretch film is widely used to secure and stabilize products on pallets for shipping and storage, preventing movement and damage during transit.

### UNITIZING LOADS

It helps to combine multiple items into a single unit, making handling and transportation easier.

### RETAIL PACKAGING

In retail, it is often used to package products for display or to secure merchandise on shelves.

### AUTOMOTIVE

Manufacturers use stretch film to protect parts and components during production and transport, minimizing damage and contamination.

### HEALTHCARE

In medical settings, stretch film is used to package and protect medical supplies, ensuring they remain sterile and uncontaminated.

### STORAGE PROTECTION

Items stored in warehouses or outdoor areas can be wrapped to protect against dust, moisture, and potential damage from environmental factors.

### BUNDLING

Stretch film can be used to bundle smaller items together, such as bottles, cans, or boxes, for efficient shipping and handling.

### E-COMMERCE

In online sales, stretch film is used to secure items for shipping, ensuring they arrive intact and undamaged.

### CONSTRUCTION

Stretch film can wrap construction materials, tools, and equipment to protect them from weather elements and contamination.

# STRETCH FILMS

**Rhyno Stretch Films**, symbolizes quality and top-notch service when it comes to delivering on time to its customers. We at **Rhyno Wellpack LLP** believe in bringing value and cost-effective solutions to its consumers and plan to do the same when it comes to stretch film production.

There are multiple variations of stretch films that can be produced as per requirements, which are:-

- 1) **Flame Retardant – Stops/Reduces Fire Spread.**
- 2) **Anti-UV – Protection from UV Light.**
- 3) **Biodegradable/Compostable – Eco friendly stretch film with life of 6 months to 1 year.**

Stretch films also come in two grades which are '**machine**' and '**hand**'. Machine grade stretch film is when the film roll is applied by an automated machine while hand grade is when the film roll is applied manually.
